Dear Sir,

Re: Tariff Classification Opinion on Hydrotask A-1102

We refer to your application for tariff classification opinion on the above item which was lodged by your company on behalf your client Pro Chemical Industries.

Hydrotask A-1102 is a chlorine source for the continual and biocidal treatment of cooling water. It contains ten to thirty percent of chlorine when packed and proportional doses to periodically flow and control the biological build up.

As such hydrotask A-1102 is a cooling water treatment biocide and should be appropriately classified under HS 2828.90.10

We hope that above clarifies your doubt of a mention commodity and for any clarification please liaise with Tariff and Trade Section.

Yours faithfully,

A handwritten signature in blue ink, appearing to read 'Robeen R Chand'.
