Dear Sir,

Re: Tariff Opinion - Reflective Pavement Marker

We refer to your application for tariff classification on the above item which was lodged by your company on behalf of your client Kooline Refrigeration Ltd.

We have examined the sample submitted and found that the Reflective Pavement Marker consist of a plastic housing shell with acrylic lenses on both side of the product. The marker is molded with optic grade Methyl Methacrylate (plastic) filled with adherent thermosetting compound .

Reflective Pavement Markers is a safety device used on roads. The device's reflective surface enables the device to be clearly visible at long distances at night and in rainy weather.

In our opinion the Reflective pavement Marker is appropriately classified under Tariff Item 3926.90.90. The effective date of this classification shall be the date of this letter.

I hope the above clarifies Tariff Classification opinion on the above product.

Yours faithfully

A handwritten signature in black ink, appearing to read 'Monika Anand'.
